Product	Product group	DELO PHOTOBOND			
	Product code	AD491	PB437	4496	
General	Adhesive type	light-curing			
	Standard product	✓	✓	✓	
	Basis	acrylate	acrylate	acrylate	
	Color* in 0.1 mm layer thickness	colorless clear	colorless clear	yellowish clear	
	Fluorescence	–	–	–	
Curing	Curing mechanism	UV- and light-curing			
	Min. irradiation time [s]	7 UVA intensity 60 mW/cm ² 3 LED intensity 200 mW/cm ²	6 UVA intensity 60 mW/cm ² 3 LED intensity 200 mW/cm ²	50 UVA intensity 60 mW/cm ² 26 LED intensity 200 mW/cm ²	
	Recommended preactivation time	–	–	–	
	Curing specialties	very fast light fixation at least one component must be translucent			
	Curing time until initial strength	–	–	–	
	Curing time with heat	–	–	–	
	Special values	Viscosity [mPas]	90,000	8,000	17,000
		Young's modulus [MPa]	400	520	–
Elongation at tear [%]		150	110	300	
Water absorption [%]		1.0	1.0	0.7	
Properties	Special features of product	high-viscous and flexible	fast curing high strength	soft and flexible	
	Applications	plates and decorative elements to glass bottles can be used on many substrates	plastic or glass to glass can be used on many substrates	for plastics that are difficult to bond, e.g. Surlyn impact- and vibration-resistant can be used on many substrates	
	Available container sizes	900 g cartridge	30 g cartridge 1,000 g bottle	50 g 1,000 g bottle

Our selection charts/material selection guides are a technical selection aid giving an overview of various product variants. We will be pleased to provide you with sales details, such as available container sizes, stock availability and minimum order quantities, on request.

The data and information provided are based on tests performed under laboratory conditions. Reliable information about the behavior of the product under practical conditions and its suitability for a specific purpose cannot be concluded from this. It is the customer's responsibility to test the suitability of a product for the intended purpose by considering all specific requirements and by applying standards the customer deems suitable (e.g. DIN 2304-1). Type, physical and chemical properties of the materials to be processed with the product, as well as all actual influences occurring during transport, storage, processing and use, may cause deviations in the behavior of the product compared to its behavior under laboratory conditions. All data provided are typical average values or uniquely determined parameters measured under laboratory conditions. The data and information provided are therefore no guarantee for specific product properties or the suitability of the product for a specific purpose. Nothing contained herein shall be construed to indicate the non-existence of any relevant patents or to constitute a permission, encouragement or recommendation to practice any development covered by any patents, without permission of the owner of this patent. All products provided by DELO are subject to DELO's General Terms of Business. Verbal ancillary agreements are deemed not to exist.
